

# Annual Report 2015/16

## Making a difference for the people of Sheffield

*"If it's not good enough for my mum, it's not good enough for anyone"*  
Kevin Clifford, Chief Nurse

 5000 citizens in Sheffield have developed a care plan to help them be more involved in decision-making about their care

**Sheffield is one of six sites around the country to trial the PAM (Patient Activation Measure)**

 Sheffield patients were the first to benefit from the nationwide rollout of the summary care record through community pharmacies

**Reduced the amount of time people arriving in hospital by ambulance have to wait to be transferred into the hospital** 

**For the first time a dedicated, age appropriate mental health service is now available for 16 & 17 year olds**

Women can receive gynecological testing at their GP practice rather than attending the hospital

 **We developed the first personal health budgets for children that qualify for CHC (Continuing Health Care)**

Patients in the city have been benefiting from more access to health and care services out of hours 

Pregnant women and new mums will receive clearer information on the support available to them through the improved pathway for perinatal mental health.

## Our Ambitions

**Closer working between GPs, practice teams & community based health and social care services** 

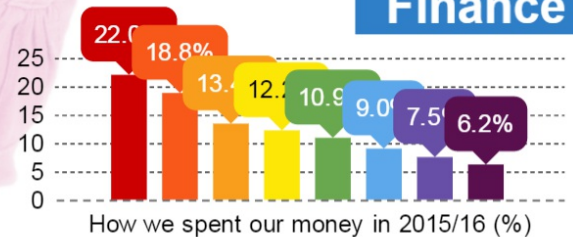

**Bring more services into local communities**

Reduce early deaths in adults with serious mental illness & improve life expectancy for people with learning disabilities 

 **Help all children have the best start in life**

Care plans for those with risk of hospital admission 

## Finance

■ Planned Care 
 ■ Urgent Care 
 ■ GP Prescribing 
 ■ Other Acute (inc Ambulance) 
 ■ Mental Health & LD 
 ■ Long Term Care & End of Life 
 ■ Primary & Community Services 
 ■ Intermediate Care & Reablement

## Future

 **NHS Five Year Forward View**

**Services will be designed for the specific needs of a local population**

Greater integration with health & social care 

**Community based approach**
